City of Kingston Archaeological Master Plan

Recommendations of the Plan include the establishment of planning policies, guidelines, and provisions for implementation. The documentation of sites in an Archaeological Master Plan includes the mapping of known archaeological sites and identifies the location of built heritage resources, traditional land use patterns, and site integrity mapping. The Plan also identifies the areas within the municipality where no further archaeological assessments are required. This report also includes a recommendation to amend the City's legal deposit bylaw for archaeological assessments to better ensure compliance and to ensure that municipal staff have the required information for the decision making process.

Information regarding the above can be viewed at the Planning and Development Department, 1211 John Counter Boulevard, during normal office hours, 8:30 a.m. to 4:30 p.m., Monday to Friday.
