PUBLIC INFORMATION CENTRE (OPEN HOUSE)

CANA WASTEWATER TREATMENT PLANT SCHEDULE C CLASS ENVIRONMENTAL ASSESSMENT UTILITIES KINGSTON

Study Background:

Utilities Kingston is undertaking a Municipal Class Environmental Assessment (Class EA) to evaluate options for the management (i.e. collection, conveyance, and treatment) of sewage from the 32-home Cana community. The location of the existing plant is shown in the figure below. The study is being conducted according to the Municipal Class EA process, and is currently considered a Schedule C undertaking. The treatment capacity of the plant is not being increased as part of this project.

The EA has been implemented to address the infrastructure in the Cana community, since the existing facility and collection system are aging and in need of repair. The existing sewage collection system has been in operation for approximately 50 years and preliminary investigations have revealed that improvements are required. The Cana WWTP was commissioned in 1973 and has not been substantially improved since that time. Given that effluent quality requirements have become increasingly stringent, and that the existing plant is in need of repair, this Class EA will seek to provide recommendations for what form improvements to the system should take.

Study Process:

The EA is proceeding as a Schedule C undertaking in accordance with the requirements of the Ontario Municipal Class EA. It will involve an assessment of the potential positive or negative social, cultural, economic, and environmental impacts of a number of options

Public Consultation:

Public and agency consultation is a key element throughout the Class EA process. You are invited to attend an Open House to review information about the study, learn more about the Class EA process, provide your feedback, and meet the project team. Please drop in any time during the Open House to learn more about the project.

Date: Tuesday, Aug. 31, 2010
