

CLEAN MARINE POLICY-2009
PORTSMOUTH OLYMPIC HARBOUR AND CONFEDERATION BASIN MARINA

As a client of the City of Kingston's Marinas Operations, I, _____ confirm that I have read, that I am familiar with and that I fully agree with the intent of City of Kingston Marina's Clean Marine Policy listed below. I am aware that the City of Kingston Marinas is adopting Clean Marine Practices throughout the facility. I will make every effort to comply with those practices where possible and help the marina to protect our natural environment.

I commit my guests, my crew and myself:

1. To keep all refuse and garbage of any kind on board the boat until we are able to place it in the waste containers on shore.
2. To separate all recyclables as possible and place them in the appropriate containers.
3. To separate hazardous wastes, including used oils and antifreeze, unwanted paints, solvents and cleaners, batteries and old unusable fuel and dispose of them in accordance with marina guidelines or else take all such wastes to the municipal household hazardous waste collection site.
4. To take all necessary steps to avoid spilling fuel (fuelling at the dock is prohibited), oil or any chemicals or cleaners whatsoever into the water and to refrain from pumping oil-contaminated bilge water overboard.
5. To carry out repair work on the boat in designated areas only, taking all precautions required by the marina to avoid leaving any debris, litter, solid or liquid contaminants on the ground.
6. To make all efforts to contain paint from sanding or scraping projects. Paint scrapings will be captured by a ground cloth. Paint dust will be captured through the use of a dustless sander using a vacuum and filter attachment. Paint refuse will then be double plastic bagged and disposed of in the garbage dumpster (not in garbage cans).
7. To never discharge raw sewage from the black-water holding tanks to anywhere other than an approved pump-out facility.
8. To avoid pumping grey water overboard while docking in the marina and to use the onshore washroom facilities whenever practical.
9. To conserve water by using an automatic shutoff nozzle when filling or washing the boat.
10. To use environmentally-friendly products (such as Eco Logo Products) whenever and wherever possible.
11. To operate the boat in a safe and considerate manner at all times, to operate the engines only when necessary and to avoid creating a wake when entering and leaving the marina.
12. To always show respect for the environment and for the fish, birds and animals and all other creatures that share it with us.
13. To promote Clean Marine practices at all time.

Please become a partner in our Clean Marine Program upon returning the signed pledge to our office and receive our token of appreciation for you and your crew's commitment.

Thank you

Ed Leeman
Supervisor, Community Facilities
