   (ii) Semi-Detached Dwelling House
   (iii) Row Dwelling House
   (iv) Linked Dwelling House

(b) The lands identified in Schedule “C” of this By-law as having a Holding ‘H’ Symbol for the purposes of introducing a second residential unit shall be required to satisfy conditions to address the applicable servicing constraint, prior to the ‘H’ symbol being removed and a building permit issued:
Constraint Area – Water Supply/Water Quality:

(i) a Second Residential Unit that is contained or attached to the Principal Dwelling Unit: a letter of opinion signed by an independent, qualified professional holding a valid licence to practice in Ontario as either an engineer (P.Eng.) or geoscientist (P.Geo) shall be submitted to the City confirming that the private water supply is sufficient to support the Second Residential Unit in combination with the normal operation of the Principal Dwelling Unit on the lot. The letter must be in a form satisfactory to the City’s Environment Director (or designate) and must adequately demonstrate how the supply well will support the increased demand required by the Second Residential Unit, while ensuring that neighbouring wells are not adversely impacted. In addition, the letter must include a statement confirming that any water quality treatment systems in place at the time of review are sufficient in terms of design, maintenance and condition to safely service the proposed Second Residential Unit in combination with the existing Principal Dwelling Unit. Approval of the septic system must be obtained from KFL&A Public Health. Notwithstanding the foregoing, the Hamlet of Sunnyside and the St. Lawrence community do not require confirmation of water supply in order to remove the holding provision;

(ii) a detached Second Residential Unit: a hydrogeological study shall be completed to the satisfaction of the City’s Environment Director (or designate) by an independent qualified professional (P.Eng.) or geoscientist (P.Geo), confirming that the groundwater quality and quantity are sufficient for the Second Residential Unit and will not adversely impact the water supply of adjacent lots and the Principal Dwelling Unit. In addition, the hydrogeological study must assess the potential for sewage system impact and demonstrate that:

• the area of development is not hydrogeologically sensitive; and

• the sewage system is isolated from the receiving aquifer, or the impact of the Principal Dwelling Unit plus the Second Residential Unit is less than 10mg/L nitrate-nitrogen at the property boundary.

The hydrogeological study shall be completed in accordance with the City’s Standard for Hydrogeological Assessments. The City’s Environment Director (or designate) may, in its sole discretion, modify the requirements of a full hydrogeological study, if warranted.
Approval of the septic system must be obtained from KFL&A Public Health. Notwithstanding the foregoing, the Hydrogeological Study required to establish a second residential unit in the Hamlet of Sunnyside and the St. Lawrence community shall be scoped to only demonstrate that there will be no negative sewage system impacts in accordance with the requirements noted above.

Constraint Area – Servicing Capacity (Cana Subdivision): a letter of opinion to the satisfaction of Utilities Kingston from a qualified professional confirming that water and/or wastewater capacity issues will not be experienced on the lot as a result of the establishment of a second residential unit.

(c) A second residential unit is not permitted on the lands identified as ‘Constraint Area – Sewer Capacity Limitations’ in Schedule “C” of this By-Law.

(d) A second residential unit shall only be permitted if it is connected to municipal services or private water and sewerage systems approved by the authority having jurisdiction.

(e) A second residential unit shall not be permitted on a lot containing two or more dwelling units, a garden suite, boarding house, or lodging house.

(f) A second residential unit shall not be permitted on lands identified as Natural Hazards Area in Schedule “D” of this By-Law, or on any lands otherwise identified as a natural hazards area through a site-specific investigation or analysis.

(g) The establishment of a second residential unit shall not be limited by any special zone provision that establishes the maximum number of dwelling units.

(h) A maximum of one second residential unit shall be permitted per lot.

(i) Where this By-Law calculates density as a measure of dwelling units per net hectare, a second residential unit shall be exempt from this calculation.

(j) Second residential units shall be exempt from any minimum lot area requirement established per dwelling unit on a lot.
(k) A second residential unit shall comply with the maximum floor space index (FSI) where such requirement has been established for the Zone in which it is located.

(l) A second residential unit shall comply with the required minimum landscaped open space where such requirement has been established for the Zone in which it is located.

(m) A tandem parking space shall be permitted to facilitate a second residential unit. A parking space for a second residential unit may be located in a permitted driveway that is within a front yard. The parking space for the second residential unit shall meet all other applicable provisions of this By-Law.

(n) Where a second residential unit is attached to the principal dwelling unit, the second residential unit must have a separate exterior entrance. The separate entrance may be located at the side, rear or front of the principal dwelling unit. A separate entrance may also be provided through a joint front entrance vestibule within the principal dwelling unit.

(o) The exterior entrance to the second residential unit that is within a principal dwelling (i.e. not a detached second residential unit) and is located at the side or rear of the principal dwelling, shall be accessed by a minimum 1.2 metre wide unobstructed pathway provided from the front of the principal dwelling unit building or the front lot line. For the purposes of this Section, a “pathway” is defined as a hard surface treated path that is separately delineated from the driveway and provides pedestrian access. “Unobstructed” means no obstructions to a height of up to 2.3 metres. This provision shall not prevent the establishment of a gate to access the rear yard.

(p) No person may park a vehicle on any part of a pathway as defined in Section 5(32)(o).

(q) The use of a separate driveway to provide unobstructed access to a detached second residential unit may be provided where the driveway and parking space requirements of this By-Law are met.

(r) Access to a detached second residential unit shall be in accordance with the Ontario Building Code.

(s) The gross floor area of the second residential unit shall be equal to or less than the gross floor area of the principal dwelling unit. For the purposes of this provision, “gross floor area” shall mean the total area of each floor, whether located above, at, or below grade, including finished attic spaces measured between the outside of the exterior walls or between the outside of exterior walls and the centre line of party walls dividing the building from another building, but excluding:
i. an open porch or balcony; and
ii. areas internal to the building that are intended for storage of vehicles

(t) Detached Second Residential Units:

A second residential unit in a detached building is not subject to the accessory use regulations in Section 5(1) of this By-Law unless otherwise indicated below, and will be permitted in accordance with the provisions of Section 5(32)(a) to (s) above and the following additional provisions:

i. A detached second residential unit shall comply with the minimum yard setbacks and maximum height applicable to the principal dwelling unit in the zone in which such use is located;

ii. A detached second residential unit may be located within a rear or interior side yard, to a minimum setback of 1.2 metres from the rear or interior side yard lot line, provided the second residential unit does not exceed 5 metres in height and further provided that a solid privacy fence with a minimum height of 1.8 metres is established in accordance with the following provisions:

   a. when the detached second residential unit is situated within a rear yard only, the privacy fence shall be established around the entire perimeter of the rear yard (i.e., along the side and rear lot lines as applicable);

   b. when the detached second residential unit is situated within a side yard only, the privacy fence shall be established along the side yard lot line closest to the detached second residential unit extending from the intersection of the side lot line with the rear lot line and shall extend to the nearest part of the primary dwelling unit measured to the front lot line; or

   c. when the detached second residential unit is situated within a rear yard and a side yard, fencing shall be established in accordance with provisions set out in both subsections (a) and (b) above.

iii. A detached second residential unit shall not be located in the front yard or exterior side yard; and

iv. A detached second residential unit shall comply with the minimum distance formulae.
