**Persons per Household**
- 1 person: 33%
- 2 persons: 34%
- 3 persons: 17%
- 4-5 persons: 15%
- 6 or more persons: 1%

21-Kingscourt Neighbourhood Profile 2006
GLOSSARY OF TERMS

Aboriginal Identity: refers to those persons who reported identifying with at least one Aboriginal group, that is, North American Indian, Métis or Inuit, and/or those who reported being a Treaty Indian or a Registered Indian, as defined by the Indian Act of Canada, and/or those who reported they were members of an Indian band or First Nation.

Average Family: Income is calculated from rounded data by dividing the aggregate income of a specific group of Families (e.g., husband and wife and families with working wives) by the number of families in that group whether or not they reported income.

Census Family: refers to a married couple (with or without children of either or both spouses), a couple living common-law (with or without children of either or both partners) or a lone parent of any marital status, with at least one child living in the same dwelling. A couple may be of opposite or same sex. ‘Children’ in a census family include grandchildren living with their grandparent(s) but with no parents present.

Common Law Status: refers to persons who live together as a couple but who are not legally married to each other. These persons can be of the opposite sex or of the same sex.

Employed: Persons who, during the week (Sunday to Saturday) prior to Census Day (May 16, 2006), were either employed or unemployed during the week (Sunday to Saturday) prior to Census Day (May 16, 2006).

Labour Force: Refers to persons who were either employed or unemployed during the week (Sunday to Saturday) prior to Census Day (May 16, 2006).

Legal Marital Status: Refers to legal conjugal status of persons:

- Never married (single)
- Married
- Separated, but still legally married
- Divorced
- Widowed

Mother Tongue: Refers to the first language learned at home in childhood and still understood by the individual at the time of the census.

Non-Official Languages: Refers to the language, other than French or English, which the respondent can conduct a conversation.

Not In Labour Force: Refers to persons who, in the week (Sunday to Saturday) prior to Census Day (May 16, 2006), were neither employed nor unemployed. It includes students, homemakers, retired workers, seasonal workers in an ‘off’ season who were not looking for work, and persons who could not work because of a long term illness or disability.

Unemployed: Persons who, during the week (Sunday to Saturday) prior to Census Day (May 16, 2006), were without paid work or without self-employment work and were available for work and either:

- had actively looked for paid work in the past four weeks;
- were on temporary lay-off and expected to return to their job;
- had definite arrangements to start a new job in four weeks or less.

Visible Minority Population: Refers to the visible minority group to which the respondent belongs. The Employment Equity Act defines visible minorities as ‘persons, other than Aboriginal peoples, who are non-Caucasian in race or non-white in colour’.

Sources and Endnotes:

Source: Statistics Canada, 2006 Census

Statistics Canada information is used with the permission of Statistics Canada. Users are forbidden to copy the data and redisseminate them, in original or modified form for commercial purposes, without the expressed permission of Statistics Canada. Information on the data can be obtained from their website http://www.statcan.gc.ca

Census data has been collected using either 100% of the population or a 20% sample and weighted to compensate for sampling. The 20% sample excludes the institutional population. Sampling partly explains the variation in total among charts or tables. Variation may be the result of Statistics Canada’s use of “random rounding” plus/minus 5 or 10. Some pie charts that do not add up to 100% may also be due to random rounding. This technique does not add statistically significant error to the data.
